Stockholm Furniture & Light Fair, February 2018

PRESS RELEASE

The new Petite 4610 floor lamp is designed to meet the demand of our customers: the exceptional height of only 130 cm makes Petite 4610 floor lamp a perfect companion beside an armchair or a desk. Just like the other members of the Petite family the shade is smaller compared to the classic Secto Design lighting range. Thanks to the rotating shade the light can be easily directed to where it's needed. Petite 4610 floor lamp comes in four different finishes: untreated birch, white or black laminated or walnut veneer. The metal parts are made of powder painted steel. Petite 4610 uses the latest LED technology with dimming feature.

Secto Design is a Finnish company specialized in design lights hand-crafted of top-quality local PEFC-certified birch wood. The demanding work is carried out by our highly talented local craftsmen in the town of Heinola in Central Finland. The entire lighting collection is designed by the award-winning Finnish Architect Mr Seppo Koho.

The wooden warmth of the design lights suits a variety of different tastes and the lamps are shipped to over 70 different countries around the world. Their clear but interesting architectonic forms are appreciated not only by private clients and professionals, but also by judges of prestige design competitions. In 2017, the Secto Design lamps won the following prizes: Fennia IPR Excellence Prize, 2016 Good Design© Award as well as Restaurant and Bar Product Design Award.

The authentic Secto Design lamps are now labelled with a hologram sticker.
