

PRESS RELEASE

Secto Design collection presented at Design Shanghai for the first time! Secto Design is proud to introduce its collection of wooden design lights for the very first time at Asia's leading international design event, Design Shanghai.

Secto Design is a Finnish company specialized in design lights hand-crafted of top-quality local PEFC certified birch wood. The demanding work is carried out by highly talented local craftsmen in the town of Heinola, Finland. The entire lighting collection is designed by the award-winning Finnish Architect Mr. Seppo Koho.

This year Secto Design is celebrating the 20th anniversary of the very first Secto Design lamp, the conical Secto 4200 pendant, which came out in 1999 forming the backbone for the entire lighting collection and the brand. Nowadays the collection consists of 25 different models which together form a distinctive and unique appearance of the brand. Finnish quality and environmental friendliness are among the key values of the company.

The wooden warmth of the design lights suits a variety of different tastes. The lamps are shipped to over 70 different countries around the world. Their clear but interesting architectonic forms are appreciated by private clients and professionals as well as by judges of prestige design competitions. The lamps are internationally praised for their quality, functionality, timelessness and suitability for a variety of different styles.

The authentic Secto Design lamps are now labelled with a hologram sticker.
