## Secto Design

Secto Design is a Finnish family-owned company specialising in wooden lighting, designed and manufactured at the company's own factory in Heinola, Finland. Made from Finnish birch, the luminaires combine refined forms with skilled woodworking and careful finishing. The lighting collection launched in 1999 continues to expand steadily, offering versatile solutions that suit a variety of interiors and architectural styles. The natural warmth of wood and the clean, architectonic forms help create a welcoming atmosphere, appreciated by both private and professional clients. Today, around 90% of production is exported worldwide.

**Long-lasting quality** lies at the core of Secto Design – alongside functionality, refined forms, a skilful use of materials, and thoughtful detailing. Sharing a consistent visual language, the different models can be effortlessly combined to bring harmonious continuity to any space. Their airy appearance comes to life when lit, yet they retain their grace even with the light turned off.

**Sustainability** is reflected in the decisions Secto Design makes about materials, manufacturing and product development. The lamps are made from Finnish birch, with the wooden components sourced from PEFC-certified forests. Secto Design has assessed the environmental impacts of its luminaires through Life Cycle Assessment (LCA) following EN 15804. The results form the basis for individual Environmental Product Declarations (EPDs), first published in 2025.

**Finnish birch**, known for its strength and resilience, is ideally suited to the form-pressed shapes featured in the collection. The birch used by Secto Design comes from PEFC-certified Finnish forests. PEFC certification supports responsible forest management and the traceability of wood through the supply chain.

Each Secto Design lamp brings together the natural character of Finnish birch, considered design and skilled manufacturing, creating a product intended to be used and appreciated for years to come.
