Secto Design Oy owns and controls all the intellectual property rights of the designs of its products and related material such as photos and drawings. All use of Secto Design Oy's intellectual property rights without written permission is strictly prohibited. Secto Design Oy takes the protection of intellectual property rights very seriously. If Secto Design Oy's intellectual property rights have been used without permission, legal proceedings might be brought against the interfering party, seeking monetary damages and/or an injunction to stop infringing the rights. Legal cost payments may result.

Secto Design

From Finland

Secto Design is a Finnish company specialized in design lamps handcrafted from top-quality PEFC certified Finnish birch wood. The demanding work is carried out by highly talented local craftsmen in the town of Heinola, Finland. The entire lighting collection is designed by the award-winning Finnish architect Seppo Koho.

The wooden warmth of the Secto Design lights suits a variety of different tastes. About 95 % percent of the lamps are exported to over 80 different countries around the world. The clear and interesting architectural forms of the lamps are appreciated by both private clients and professionals.

Designer Seppo Koho

Architectonic touch

Secto Design has collaborated with the internationally acclaimed architect, interior designer Seppo Koho (b. 1967) since 1995, first on furniture and since 2002 focusing solely on lamps. Seppo Koho is a graduate from both Helsinki University of Art and Design and Tampere University of Technology. Currently he runs his own architecture studio in Helsinki.

Seppo Koho's architectonic touch is clearly visible in the Secto Design lighting collection. All the lamps are suitable both for public and private interiors which for him is a sign of good design. Seppo Koho also regards the Secto Design lamps as lighted spaces seen from outside, like cosy houses on a dark evening.

Design philosophy

Seppo Koho not only designs the lamps but also makes the first prototypes by hand himself. He has always been interested in wood crafting and experimenting with the possibilities that wood as a material can bring. Making a wooden prototype of a new lamp solves many details in the design a computer drawing cannot answer to.

Seppo Koho's aim is to make lamps that give a harmonious light without the blinding shine coming from visible lightbulbs. The light source is hidden in all the Secto Design lamps whereas the light itself is visible in the fascinating patterns it makes on the walls and floor. The play of light and shadows together with the warmth of the birch wood give Seppo Koho's minimalistic designs a poetic twist that intrigue people all around the world.

“I truly enjoy turning sketches into wooden prototypes with my own hands. Finding a concrete solution to implementing a detail after persistent experimenting is a fascinating moment.”

Seppo Koho, Architect & Designer

Our Story

“The respect for Northern wood, clear Scandinavian design and professional woodworking is the basis of the Secto Design lighting collection.”

Tuula Jusélius, Founder

The beginning

The founder of Secto Design, Tuula Jusélius and designer Seppo Koho first met in 1995. From the very first time they met they knew they were kindred spirits; they both shared a respect for Northern wood as well as for Scandinavian design and professional woodworking.

Tuula Jusélius and Seppo Koho started collaborating on innovative wooden furniture. The furniture was a success but there was a puzzle that the customers were left with: no wooden lamps were on the market that would go together with the furniture. Inspired by this, the conical Secto 4200 pendant was born, and it became the backbone of the whole Secto Design collection of wooden lamps.

Going international

Over the years Secto Design has built a comprehensive worldwide retailer network and is represented widely across the world. About 95 % of the production is exported to over 80 countries. To strengthen the presence in the international market Secto Design USA was established in 2017 and Secto Design France and Secto Design Denmark in 2022.

Along with the new models and increasing national and international demand, what originally was a small workshop in Heinola has now grown into a busy factory with about 40 employees. Since 2017 the factory, Sectomo, is owned entirely by Secto Design. The CEO of Sectomo, Joakim Jusélius, represents the second generation of the family-owned design lighting company.

Innovative with artisanal touch

Back in the days the new Secto 4200 pendant was a real innovation and unique. It took a considerable amount of time and effort to find a cabinetmaker capable of producing Secto lamps in large quantities yet still maintaining the artisanal touch. The new wooden lamp and its delicate light attracted people. Wood as a lamp material was welcomed to the lighting market with both surprise and astonishment. Today, the lighting collection comprises 29 different models and keeps up its steady growth. 16 lamp models are now ETL/CETL certified.

Battle against piracy

The unique wooden structure of Secto Design lamps has attracted some unwanted admiration as well. The battle against piracy, promoting original design and valuing the skills of Finnish craftsmen are extremely important for Secto Design. Regardless of the time-consuming task of monitoring the market for replicates, Secto Design is very committed to standing behind its IPR rights. All Secto Design lamps are now marked with a hologram sticker when leaving the factory in order to help the customers to recognize the original Secto Design product from a fake one.

Secto Design cooperates with both Love Original and Be Original Americas organisations that combat counterfeit design, support authentic creative work and protect the history of design and the future of innovation.

Classic innovation

The very first Secto pendant.
An innovative modern classic,
that led to the birth of the Secto Design collection.

Secto 4200

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 23.6 in	
	Diameter Ø 11.8 in	
	Weight 3.1 lb	
	Package 13.0 × 13.0 × 25.2 in, 5.3 lb	
Voltage	120V 60Hz	
Light source	E26 (max. 22 W) or GU24 (max. 17 W)	
Cable	8 ft, textile cable, ceiling connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	ETL/CETL certified	

Modern and approachable

The smaller Secto pendant suitable for spaces with lower ceilings. Impressive in rows and larger groups.

Secto Small 4201

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 17.7 in	
	Diameter Ø 9.8 in	
	Weight 2.6 lb	
	Package 10.2 × 10.2 × 19.7 in, 3.7 lb	
Voltage	120V 60Hz

Grand and airy

This grand and airy pendant is a classic. A magnificent suspension that is comfortable also in small spaces due to its lightness.

Octo 4240

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 26.8 in	
	Diameter Ø 21.3 in	
	Weight 4.4 lb	
	Package 23.2 × 23.2 × 30.3 in, 10.4lb	
Voltage	120V 60Hz	
Light source	E26 (max. 22 W) or GU24 (max. 17 W)	
Cable	8 ft, textile cable, ceiling connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	ETL/CETL certified	

Chic eye-catcher

This much foreseen compact model of the classic Octo is beautiful on its own, in a row or in groups in any interior.

Octo Small 4241

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 21.6 in	
	Diameter Ø 17.7 in	
	Weight 2.9 lb	
	Package 19.7 × 19.7 × 25.2 in, 7.7 lb	
Voltage	120V 60Hz	
Light source	E26 (max. 22 W) or GU24 (max. 17 W)	
Cable	8 ft, textile cable, ceiling connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	ETL/CETL certified	

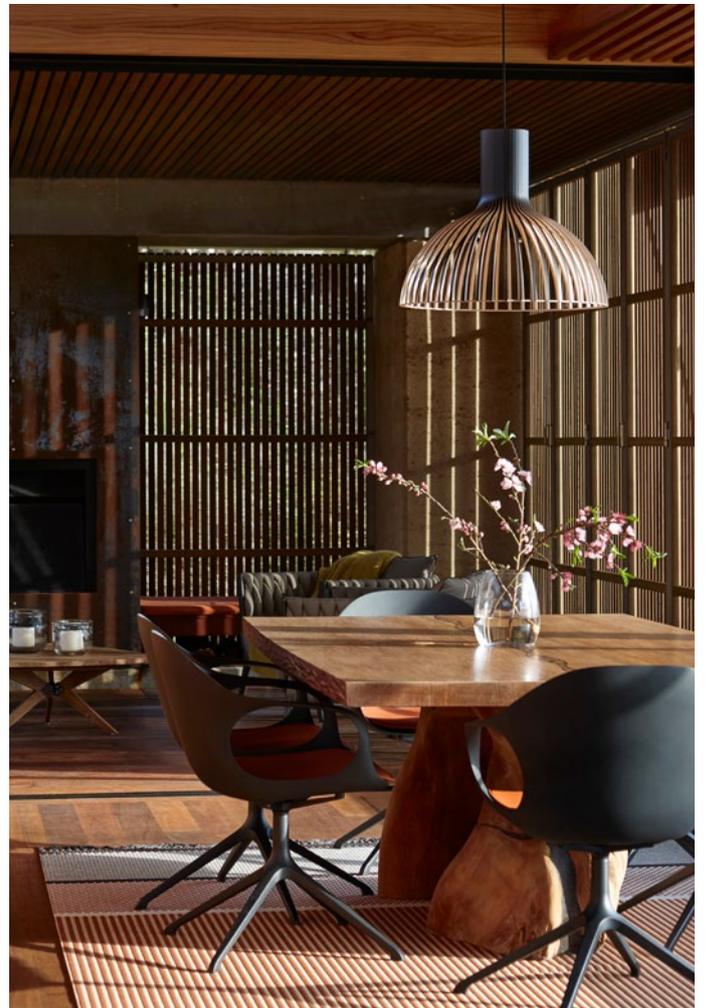

Soft luminosity

Victo invites people to gather around it.
Perfect interior decor above a table providing a warm and cosy light.

Victo 4250

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 18.9 in	
	Diameter Ø 22.0 in	
	Weight 3.5 lb	
	Package 23.2 × 23.3 × 21.7 in, 8.2 lb	
Voltage	120V 60Hz	
Light source	E26 (max. 22 W) or GU24 (max. 17 W)	
Cable	8 ft, textile cable, ceiling connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	ETL/CETL certified	

Light and versatile

A resized solution to compact interiors and captivating lamp installations. Attractive both on its own and in groups.

Victo Small 4251

Finishes	Shade	Cable + ceiling cup
	● Natural birch	White
	○ White laminated	White
	● Black laminated	Black
	● Walnut veneer	White
Material	Form pressed birch slats	
Dimensions	Height 15.5 in	
	Diameter Ø 17.7 in	
	Weight 2.2 lb	
	Package 19.3 × 19.3 × 18.9 cm, 5.7 lb	
Voltage	120V 60Hz	
Light source	E26 (max. 22 W) or GU24 (max. 17 W)	
Cable	8 ft, textile cable, ceiling connector, ceiling cup	
Classification	Ingress Protection IP20	
	IEC Protection Class II	
	ETL/CETL certified	

Handcrafted by masters

The Atto 5000 is compact yet sophisticated.
A true achievement from our talented carpenters.

Atto 5000

Finishes	Shade	Cable + ceiling cup	Case
	● Natural birch	White	White
	○ White laminated	White	White
	● Black laminated	Black	Black
	● Walnut veneer	White	White
Material	Form pressed birch slats, fine textured powder coated aluminium case, acrylic diffuser		
Dimensions	Height 8.3 in		
	Diameter Ø 13.4 in		
	Weight 4.6 lb		
	Package 15.4 × 15.4 × 11.8 in, 7.1 lb		
Voltage	120V 60Hz		
Light source	A built-in LED, 12 W, 3000 K, 1400 lm, CRI 80. Dimmable with a trailing edge or a leading edge type of a dimmer.		
Cable	15 ft, textile cable, connector, ceiling cup		
Classification	Ingress Protection IP20 IEC Protection Class II ETL/CETL listed		

Modern chandelier

Kontro 6000 is a new interpretation of the chandelier. The openness of the design spreads light widely.

Kontro 6000

Finishes	Shade	Cable + ceiling cup

Classification	Ingress Protection IP20 IEC Protection Class II ETL/CETL listed		

Product overview

Handmade in Finland

Secto Design shades are made from certified, top-quality birch veneer that is form pressed into blanks. The blanks are cut into slats, which are sanded and finally connected using rings of thin plywood. The slats are glued and nailed to the rings. All Secto Design lamps undergo a thorough quality inspection before they are sent to their final destination.

The finishing options for the shades are untreated natural birch, white or black laminate or waxed walnut veneer. Other colours can be customised for projects at extra cost. The light distribution curves of the Secto Design lamps as well as further information on particular models can be found on the product pages.

LED bulbs

The majority of Secto Design lamps use LED bulbs as a light source. The recommended color temperature is pure white, 3000 K (daylight being 4000 K). For security reasons at least 0.6 in space should be left between the bulb and the shade to allow air to circulate. If a dimmer is used, please check the compatibility of the dimmer with the light source. The use of special bulbs such as halogen, mirror or 12 V is forbidden due to overheating.

Secto Design does not provide light bulbs.

Built-in LED

The built-in LED is included in the Atto 5000 and Owalo 7000 pendant lamps. The current life span estimation of LED is approximately 15 000 hours.

The Secto Design LED lamps use high-quality LEDs. Secto Design reserves the right to replace the current LED components to similar or better ones due to the rapid development of LEDs and changes in supply.

It is recommended to use dimmers optimized for built-in LEDs. The cable and the built-in LEDs can only be replaced by the manufacturer.

Cables

The colour of the cable depends on the lamp model and the colour of the shade. The standard cable colours are listed in the product information of each model.

A ceiling cup, designed by Secto Design using the patented suspension system by Dezall, and a connector are included in the cable set of the pendant lamps. The Magnum and Owalo pendants are equipped with balancing steel wires. The wall lamps come with a cable and a switch or alternatively with a direct wall mount option. The cables of the table, floor, and wall lamps in the Owalo family have a transformer. The cables or any other parts used in Secto Design lamps should not be replaced for safety reasons. Secto Design is not responsible for any damages caused by modifications.

Please regularly ensure that the ring of the lamp holder, which supports the wooden shade, is tightly fastened.

Important

Secto Design lamps are thoroughly tested. The models marked with “ETL/CETL” are available with ETL/CETL cabling.

Secto Design Oy is liable for manufacturing flaws when notice is given within a reasonable time. As the lamps are handmade from birch wood please be aware that, as with every birch tree in the forest, every Secto Design lamp is unique too. Therefore knots and other natural variations are normal.

All the original Secto Design lamps manufactured since December 2017 are sealed with a hologram label.

DALI systems

Most Secto Design lamps are attachable to DALI systems with a separate DALI-compatible trailing edge (phase cut off) type dimmer. Due to great variation in DALI systems, Secto Design does not supply DALI-dimmers. Please contact your local electrician.

Installation and maintenance

When necessary, the assembly and installation instructions are available for downloading on the product pages. Please note that the pendants should not be installed closer than 5.9 in from the ceiling in order to let air circulate. Secto Design lamps can not be installed above a stove, a washbasin or other sources of humidity.

For the maintenance of the wooden shades wipe dust regularly. To remove fresh stains wipe with a slightly damp cloth.

NB.

- Please check the product pages for detailed information.
- All given details are as precise as possible.
- The guarantee of the lamps does not cover the example bulbs.
- All original Secto Design lamps carry a hologram sticker.
- Secto Design Oy reserves the right to changes.

Safe and responsible production

Secto Design's factory, Sectomo, is located in the small town of Heinola in Central Finland. It is a modern plant adhering to the Finnish labour regulations and related EU standards.

Product safety, ease of use and high-quality handcraft are of great importance to Secto Design. All Secto Design products are CE marked and comply with the Declaration of Conformity. Likewise North American models comply with the ETL/CETL mark.

Sustainable and ecological design has always been the foundation of the Secto Design lamps. Secto Design champions the use of LED technology and recommends the use of LED bulbs for better luminosity and lower energy consumption. The packaging, custom designed for each lamp model, is made of locally produced ecological cardboard.

Birch

Secto Design lamps are made from Finnish birch wood. Strong yet resilient birch is a perfect and durable material for form pressed bent shapes like the ones in the Secto Design lamps.

Birch used for the Secto Design lamps grows in PEFC certified commercial forests. The certification guarantees ecologically, socially and economically sustainable forestry. The certification also makes the supply chain transparent. Certified birch wood can be traced back to the forest where it was logged.

The Secto Design shades are well known for their workmanship and beautiful details. Wood being a natural material some small variations are normal. The factory has established a list of parameters to distinct normal variation from sporadic defects. To ensure the highest quality all products are inspected 8-10 times during the manufacturing process.
