

## Finnish lighting meets Italian design in Milan

During Milan Design Week 2026, Secto Design presents its collection of wooden luminaires at the laCividina showroom, located in Palazzo Borromeo d'Adda in Milan's renowned Fashion District.

Designed in Finland and manufactured locally from responsibly sourced, certified birch, Secto Design luminaires are characterised by their architectural forms and softly diffused light. The collection is known for creating a warm, atmospheric presence, bringing clarity and calm to interior spaces.

At the showroom, the luminaires are featured within 'Atrio Calmo', laCividina's installation curated by the creative duo Barbieri Magalini and produced by MM Company. Conceived as a suspended, atmospheric environment—drawing on references such as Roman domus and Marrakech riads—the installation reflects laCividina's ethos and its emphasis on an authentic relationship between design and people.

Within this setting, Secto Design's lighting introduces a gentle layer of illumination, subtly shaping the space through light and shadow. The luminaires contribute to the overall atmosphere while maintaining their own distinct expression.

Visitors are invited to experience the presentation throughout the week.

Secto Design at laCividina Showroom  
Via Manzoni 41, Milan  
20–26 April, 9am – 9pm
