

## PRESS RELEASE

**Meet the novelties.** Secto Design is proud to present the brand new Secto Petite collection at Maison&Objet Paris. The Petite collection adds a smaller sized alternative to the traditional Secto Design lighting range. The Secto Petite collection consists of pendant, table and wall lights. Both the wall and table lights are adjustable as their shades turn gently pointing light where you need it the most.

**Adding user-friendliness.** The spiral-shaped LED pendant Aspiro has been updated. There is no longer a need for installation - instead it can just be plugged in like any other pendant. In addition, there is a built-in step dimming system so you can dim it just by clicking a wall switch!

**Classics suspended in a new way.** The newly launched adjustable suspension arm Varsi enables the use of the already classic Secto Design pendants in a fresh and inventive way. The length of the wall-mounted rotating steel arm is adjustable and also the hanging height of the pendant can be modified.

**Wooden warmth from Finland.** Secto Design is a Finnish company specialized in design lights hand-crafted of top-quality local birch. The entire lighting collection shares the same clear and timeless architectonic clarity. Designed by awarded Finnish architect Seppo Koho.
