

PRESS RELEASE

Secto Design is excited to participate in A@W in Oslo after such a long break from live events. It is a great feeling to finally reunite with our customers and colleagues.

We are proud to present the new Kuulto Small 9101 ceiling lamp! It is a smaller version of the well-established Kuulto 9100 ceiling lamp also featured in Oslo. The smaller Kuulto 9101 has been developed in accordance with customer demand and acts as a versatile space saver in compact rooms. Both our ceiling lamp models look stunning on their own and in groups and they can also be used to enliven walls.

We are also featuring the Atto 5000 pendant lamp which has been updated with new light technology. As a result, the light from the lamp is more even than before as well as more pleasing to the eye, as it is completely unflickering. The energy efficiency has also been improved, along with the service life. The changes are purely of a technical nature, and the visual aspects of Atto pendant lamp are unchanged. The lamp is precisely as beautiful as before.

The Victo Small 4251 pendant lamp is a smaller version of the beloved Victo pendant. The improvements in the light sources and the new small LED bulbs which do not create heat around them, have enabled the resizing the proportions of the classic Victo shade.

Secto Design is a Finnish company specialized in design lamps hand-made from top-quality local PEFC certified birch. The demanding work is carried out by highly talented craftsmen in the town of Heinola, Finland. All Secto Design lamps are sustainably and ecologically produced. The entire lighting collection is designed by the award-winning Finnish architect Seppo Koho. Secto Design lamps are appreciated for their Scandinavian design suitable for different styles and interiors.
