# Surface mounted ceiling fixture

Design by Seppo Koho

Designed as a response to the clear demand for a Secto light that would not be suspended but instead fixed to the ceiling. This light brings a new character to the world of ceiling fixtures, where wood as material is not commonly encountered. As the rest of the collection, also the new ceiling fixture can be seen as a space itself. True to designer Seppo Koho's credo, the lamp is not only a source of light but also an architectonic space that creates interesting surfaces on the ceiling and on the walls.

Hand-made in Finland of top-quality Finnish birch wood. Uses the latest LED technology.
