

PRESS RELEASE

For the first time participating in the world's largest trade fair of lighting and building services technology, Secto Design is proud to bring its collection to Messe Frankfurt for the occasion of Light+Building 2018.

Now available: Kuulto 9100, the surface mounted ceiling fixture. This light brings a new and unique character to the world of ceiling fixtures, where wood as a material is not commonly encountered. True to designer Seppo Koho's credo, the lamp is not only a source of light but also an architectonic space. Kuulto 9100 is available in all four finishes: untreated birch, white or black laminated or walnut veneer and it uses the latest LED technology.

The new Petite 4610 floor lamp is designed to meet the demand of our customers: the exceptional height of only 130 cm makes Petite 4610 floor lamp a perfect companion beside an armchair or a desk. Just like the other members of the Petite family the shade is smaller compared to the classic Secto Design lighting range. Thanks to the rotating shade the light can be easily directed to where it's needed. Petite 4610 floor lamp comes in four different finishes: untreated birch, white or black laminated or walnut veneer. The metal parts are made of powder painted steel. Petite 4610 uses the latest LED technology.

Secto Design is a Finnish company specialized in design lights hand-crafted of top-quality local PEFC-certified birch wood. The demanding work is carried out by our highly talented local craftsmen in the town of Heinola in Central Finland. The entire lighting collection is designed by the award-winning Finnish Architect Mr Seppo Koho.

The authentic Secto Design lamps are now labelled with a hologram sticker.
