

## PRESS RELEASE

**We are proud to present the novelty Victo Small 4251**, the new smaller version of our beloved Victo pendant. Victo Small complements the collection together with Octo Small launched in 2018. Both of these smaller editions have been developed as a response to a high demand from the audience. The improvements in the light sources have enabled the finalization of these two models. The incandescent bulbs needed more space in the neck of the shade, but thanks to LEDs which do not create heat around them, narrowing the neck and resizing the proportions of the shades was possible.

**Victo Small 4251 is now available for ordering.**

**Victo Small**, measuring 39 cm in height and 45 cm in diameter, provides a solution to smaller homes and other spaces where something lighter yet grand is required. One can also create captivating focal points by combining the novelty with the rest of the pendants from our collection. Victo Small comes in four finishes: natural birch, white and black laminated and walnut veneer.

**Secto Design is a Finnish company** specialized in design lights hand-crafted of top-quality local PEFC certified birch wood. The demanding work is carried out by highly talented local craftsmen in the town of Heinola, Finland. The entire lighting collection is designed by the award-winning Finnish Architect Mr. Seppo Koho. The wooden warmth of the lights suits a variety of different styles and the clear but interesting architectonic forms are internationally appreciated by both private clients and professionals as well as by judges of prestigious design competitions.

**The authentic Secto Design lamps are labelled with a hologram sticker.**
