

PRESS RELEASE

Meet the novelties: surface mounted ceiling fixture. Designed as a response to the clear demand for a Secto light that would not be suspended but instead fixed to the ceiling. This light brings a new character to the world of ceiling fixtures, where wood as material is not commonly encountered. As the rest of the collection, also the new ceiling fixture can be seen as a space itself. True to designer's credo, the lamp is not only a source of light but also an architectonic space that creates interesting surfaces on the ceiling and on the walls.

Petites add a smaller sized alternative to the traditional Secto Design lighting range. The members of the brand new Petite collection are pendant, table and wall lights. The wall and table lights are adjustable as their shades turn gently pointing light where you need it the most.

The adjustable suspension arm Varsi enables the use of the already classic Secto pendants in a fresh and inventive way. With the wall mounted steel arm the pendants can be placed in any space regardless of the ceiling structure. The length of the rotating arm is adjustable and also the hanging height can be modified. As a result, Varsi fits well in spaces with higher ceilings.

Secto Design is a Finnish company specialized in hand-made wooden design lighting. The iconic collection has a clear and timeless Scandinavian feel. All the work is carried out in Finland and the material is PEFC-certified top-quality local birch. Designed by the award-winning Architect Seppo Koho.
